APX president condoles with families of Bulacan rescuers who died in Typhoon Karding rescue mission

APX, 30 September 2022. The Philippine Mine Safety and Environment Association (PMSEA) condoled with the families of the five Bulacan PDRRMO rescuers who perished while conducting rescue activities during typhoon Karding. PMSEA president, and Apex Mining President and CEO Luis R. Sarmiento, ASEAN Eng. represented PMSEA at the Luksang Parangal of the Bulacan Provincial Advisory Group for Police Transformation and Development, where the families of the late rescuers received cash assistance.

According to Sarmiento, “Our miners and the rescue workers all over the country can be hailed as true heroes because they risk their lives to save others during emergencies and calamities.”

Mining companies are really prepared, both skills- and equipment-wise, to quickly react in emergency situations.
